

# Vyvo Life CoPilot

A new era of personal AI

vyvo

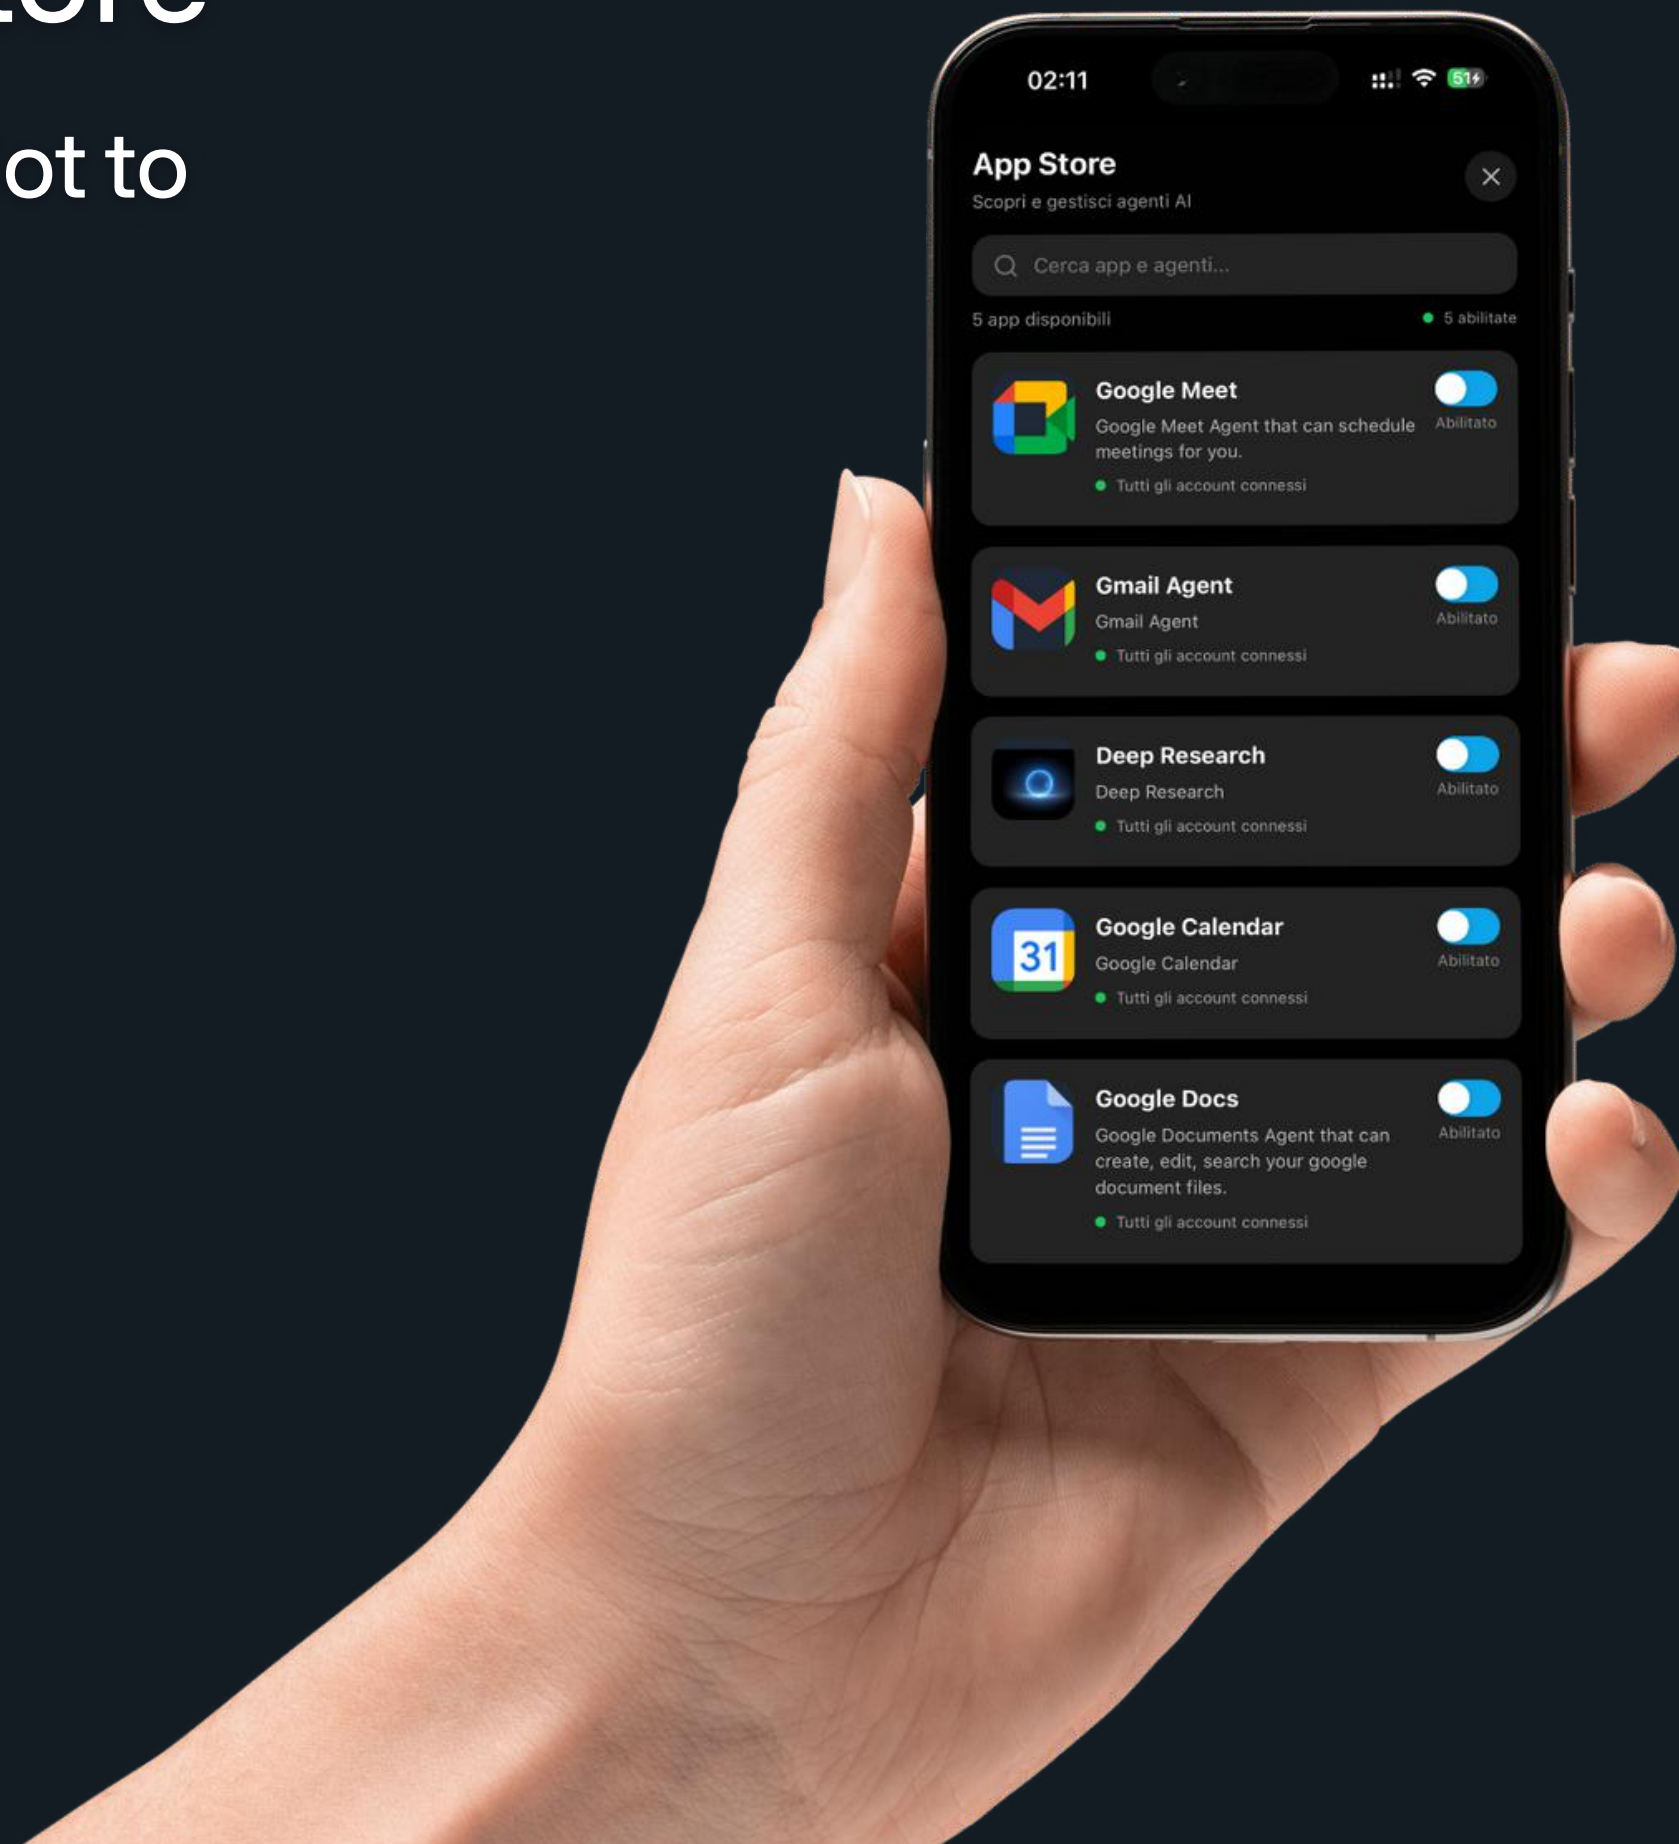

The mobile app is ready, with new features onboard.

VIVO

# Plug & Play App Store

Easily integrate your CoPilot to  
do more for you

vyvo

# A Real Personal Experience

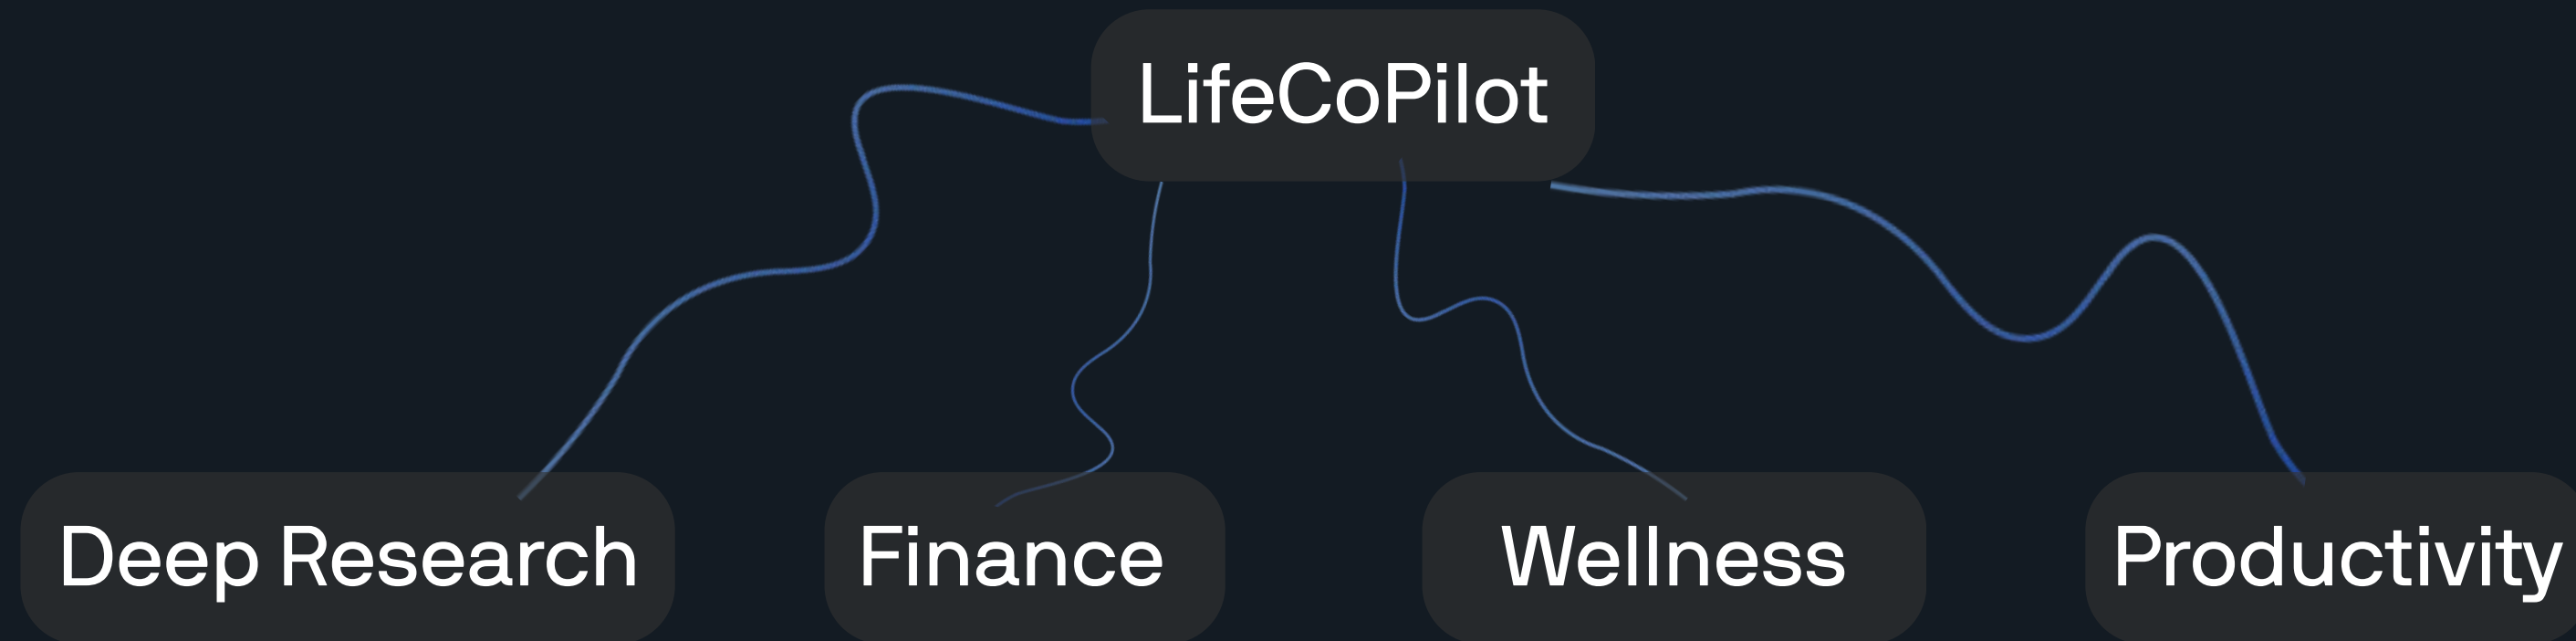

A life companion that actually understands you.

- Learns your patterns, mood, health, stress, lifestyle.
- Builds real companionship over time.
- Evolves with each moment of your life.
- More natural, predictive, and personalized.
- Adaptive responses based on your preferences, not global defaults.

# Your Team of AI Specialists

Multi-level agent teams that actually get things done.

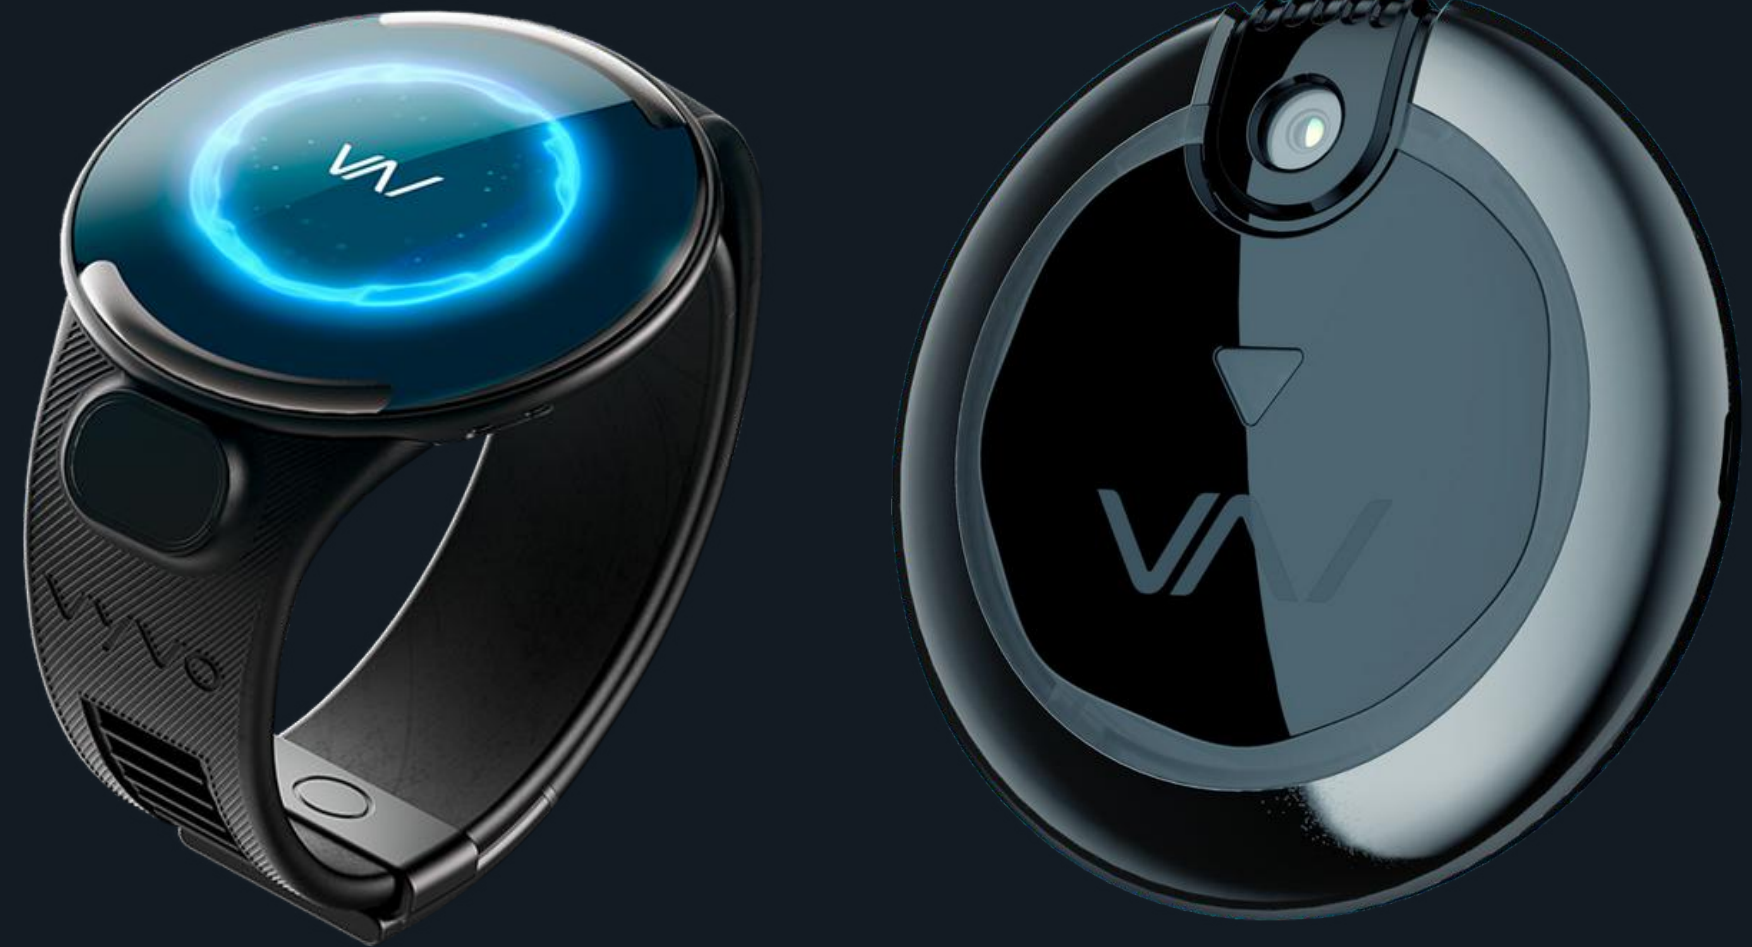

AGENTS DON'T TALK — THEY DO.

- Continuously evaluates memories and new data flowing from apps and devices.
- Detects patterns → takes autonomous actions.
- Contacts you: call, message, email. Whatever is needed.
- Predicts needs before you notice them.
- Supports mental and physical health proactively

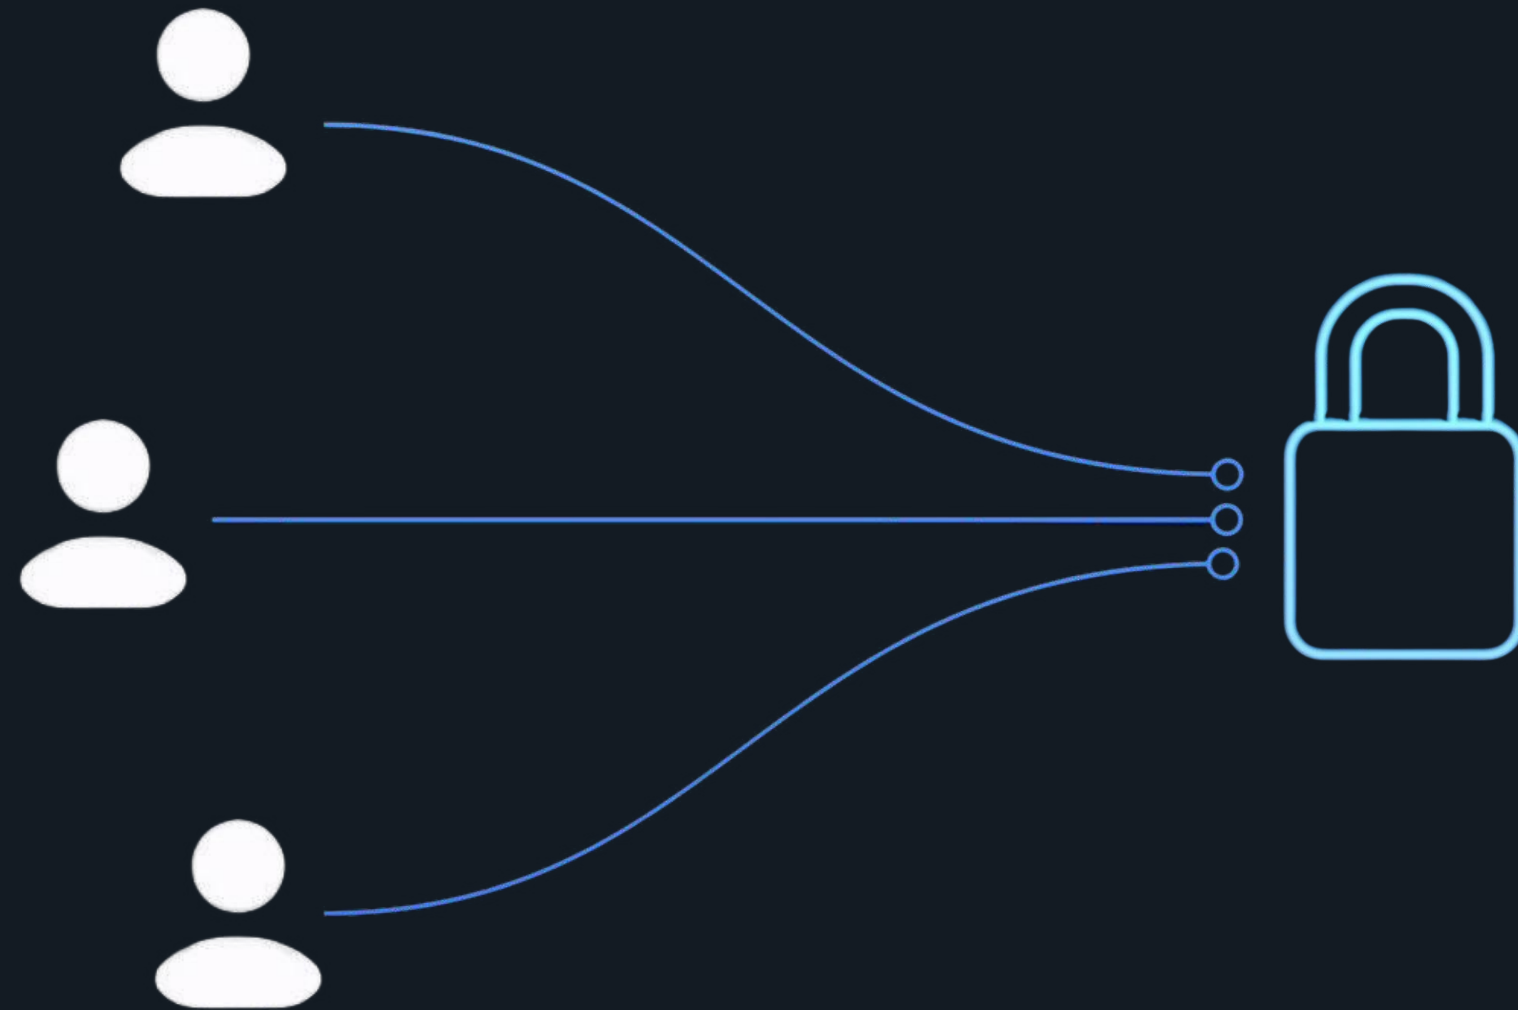

IT DOESN'T WAIT — IT ACTS.

- Works with Vyvo IOT Devices, and more.
- Your Vyvo Life CoPilot is literally one tap away.
- Enhanced biometric insights from health devices.
- Every interaction is a valuable and reason for improvement.

MORE DATA. MORE INTELLIGENCE.

- Privacy vs Personalization is no longer a trade-off.
- Encrypted personal data via DataNFTs.
- Zero selling of personal data, zero hidden pipelines.
- No usage of personal data in model training.

The First AI That Understands you Without Ever Exposing It.

PRIVACY IS OUR BUSINESS MODEL

# Privacy issues already happening...

# VYVO GENERATIVE AI

Compute power to shape the future

vyvo

- Why gold was safe harbor.
- AI adoption exploding: 87% of large enterprises use AI.
- Average \$6.5M+ investment per company.
- Most are still experimenting → huge efficiency gap.
- Current compute mainly feeds generative AI.
- Demand/Need for compute will grow exponentially (doubles every few months)

THE GOLD OF THE AI AGE.

# Community-Funded GPU Infrastructure

It rivals billion-dollar infrastructures with minimal risk, makes open-source models accessible and affordable, offers a seamless pay-as-you-go credit system for both users and enterprises, and delivers fully flexible workflows.

TEXT-TO-IMAGE

- Snapshot tech → instant model switching.
- Hyper-fast inference.
- Dedicated, optimized enterprise processing units.
- Scalable, reliable, low-latency.

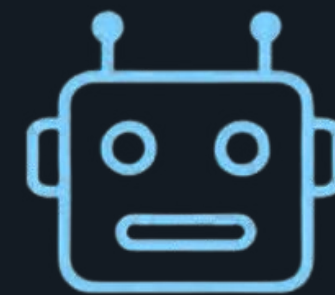

# SOLUTIONS FOR ENTERPRISES

# Artificial Superintelligence

- Artificial Narrow Intelligence (ANI) = limited intelligence on specific domains
- Artificial General Intelligence (AGI) = human-level intelligence.
- Artificial Superintelligence (ASI) = beyond human.
- Ability to reason, create, understand context deeply.
- World-changing impact on health, science, economy, creativity.

## ANI vs. AGI vs. ASI

### Artificial Narrow Intelligence

- Performs specific tasks
- Limited to one domain

### Artificial General Intelligence

- Possesses human-like cognition
- Adapts to different tasks

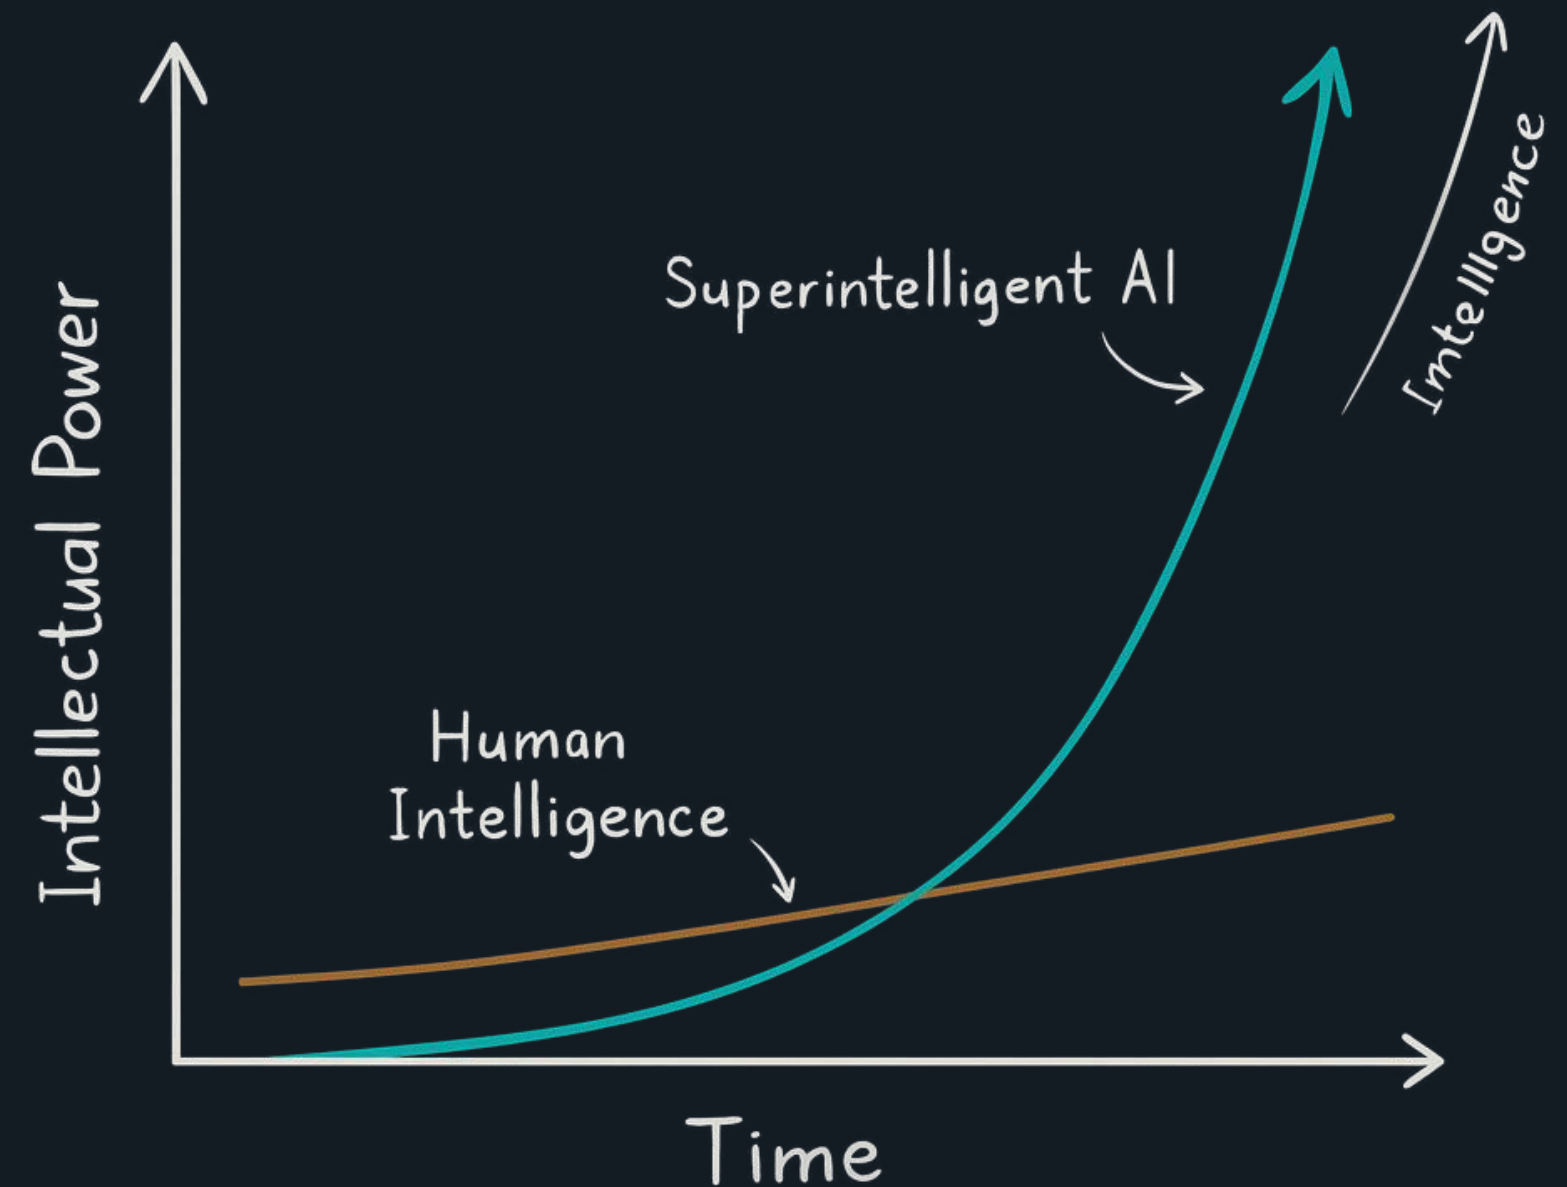

### Artificial Superintelligence

- Surpasses human intelligence
- Outperforms in all areas

# NEW ERA OF HUMANKIND

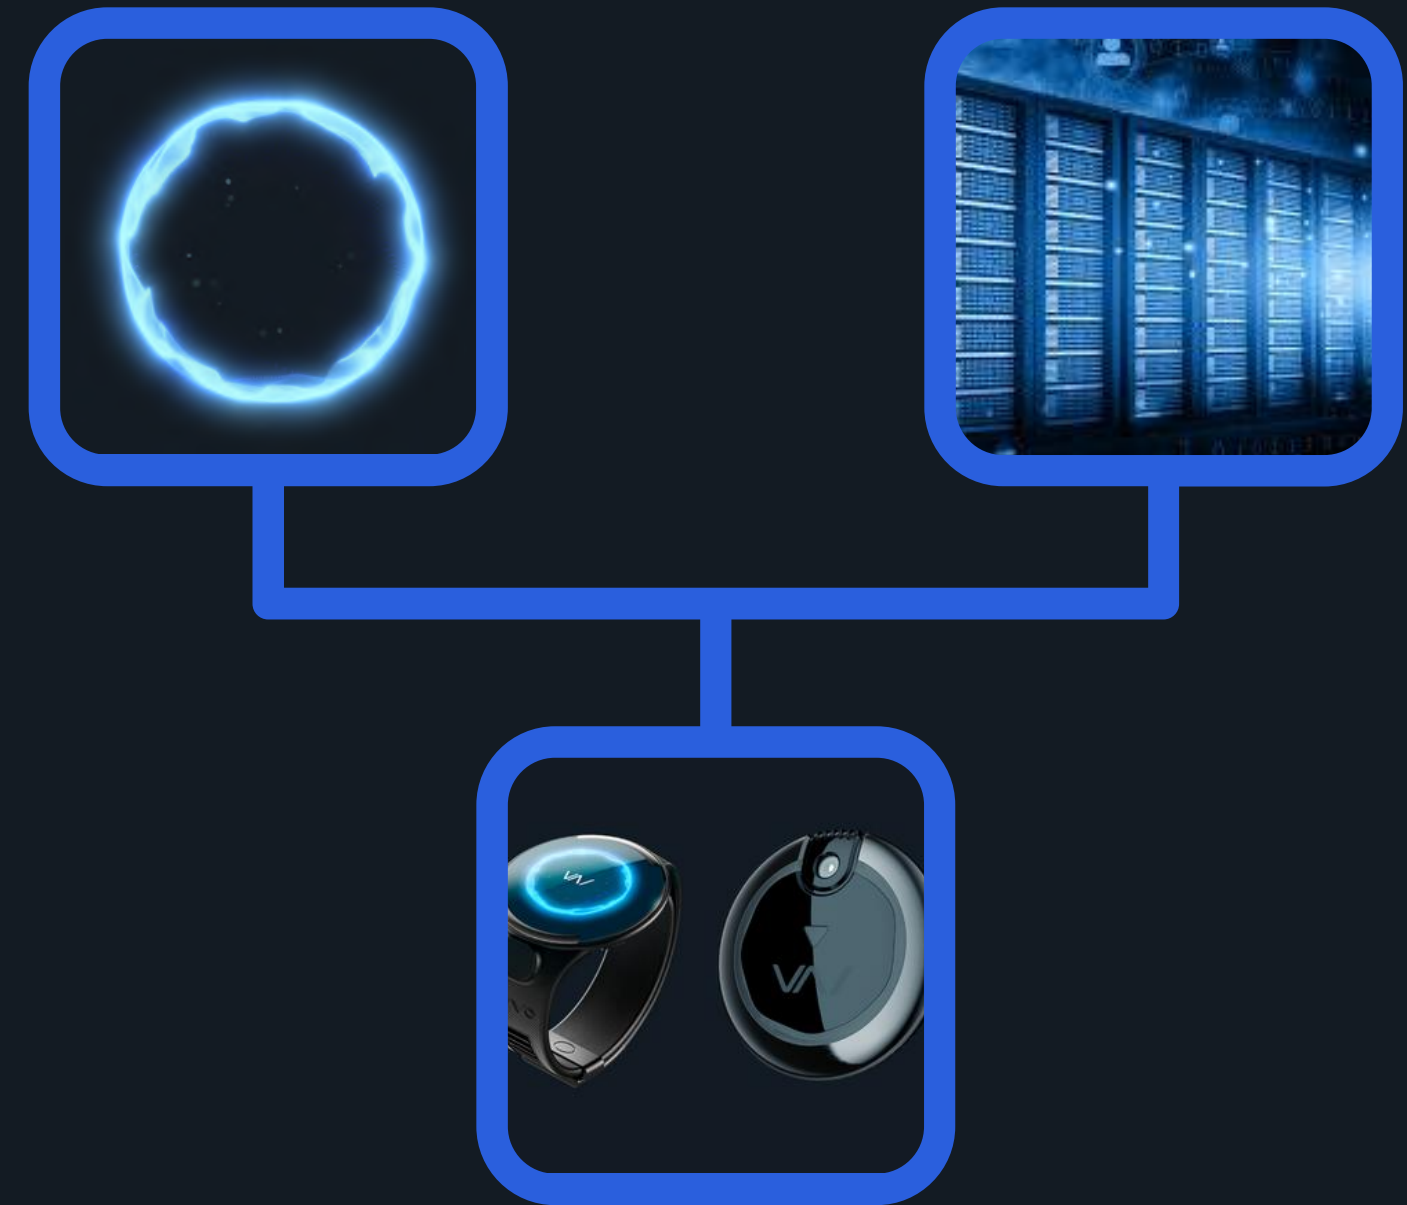

- Expected 100x productivity leaps.
- New industries, new scientific breakthroughs.
- Personal intelligence companions become universal.
- Economic shift toward automation and knowledge abundance.
- First time in history, humankind will not be the smartest being on the planet.

## Intelligence Explosion

# AGI WILL CHANGE EVERYTHING

- Life Copilot evolves → autonomous life partner.
- Compute Platform acts as the backbone for massive-scale inference.
- Community-owned infrastructure → democratizes AGI access.
- Users gain superhuman intelligence aligned with personal health, goals, and privacy.
- Built for the AGI and post-AGI era.

# AGI-READY ECOSYSTEM

We're not predicting the future. We're building it...

THE FUTURE STARTS HERE.
