Hundreds of thousands of Grok chats exposed in Google results

21 August 2025

Grok

Hundreds of thousands of user conversations with Elon Musk's (AI) chatbot Grok have been exposed in search engine results - users' knowledge.

Unique links are created when Grok users press a button to conversation - but as well as sharing the chat with the internet, it also appears to have made the chats searchable online.

A Google search on Thursday revealed it had indexed nearly 370,000 conversations.

It has led one expert to describe AI chatbots as a "privacy invasion".

The BBC has approached X for comment.

The appearance of Grok chats in search engine results was first reported by industry publication Forbes, which counted more than 370,000 user conversations in affiliate marketing can be a smart move - for those who are willing to work with Google.
