SensoryAI

AI that doesn't just respond to what you type

– it understands how you live.

Today's AI Is Powerful.

But it only learns from what you tell it.

✦ | Answers questions, generates content, and automates tasks

✦ | Doesn't know how you slept, your stress levels, or your routines

✦ | Only knows what you type

Every other AI understands prompts.
Vyvo Life CoPilot Understands Life.

AI Has a Brain.

But What If It Had Senses?

Humans learn through

Movement and environment

Emotion and habit

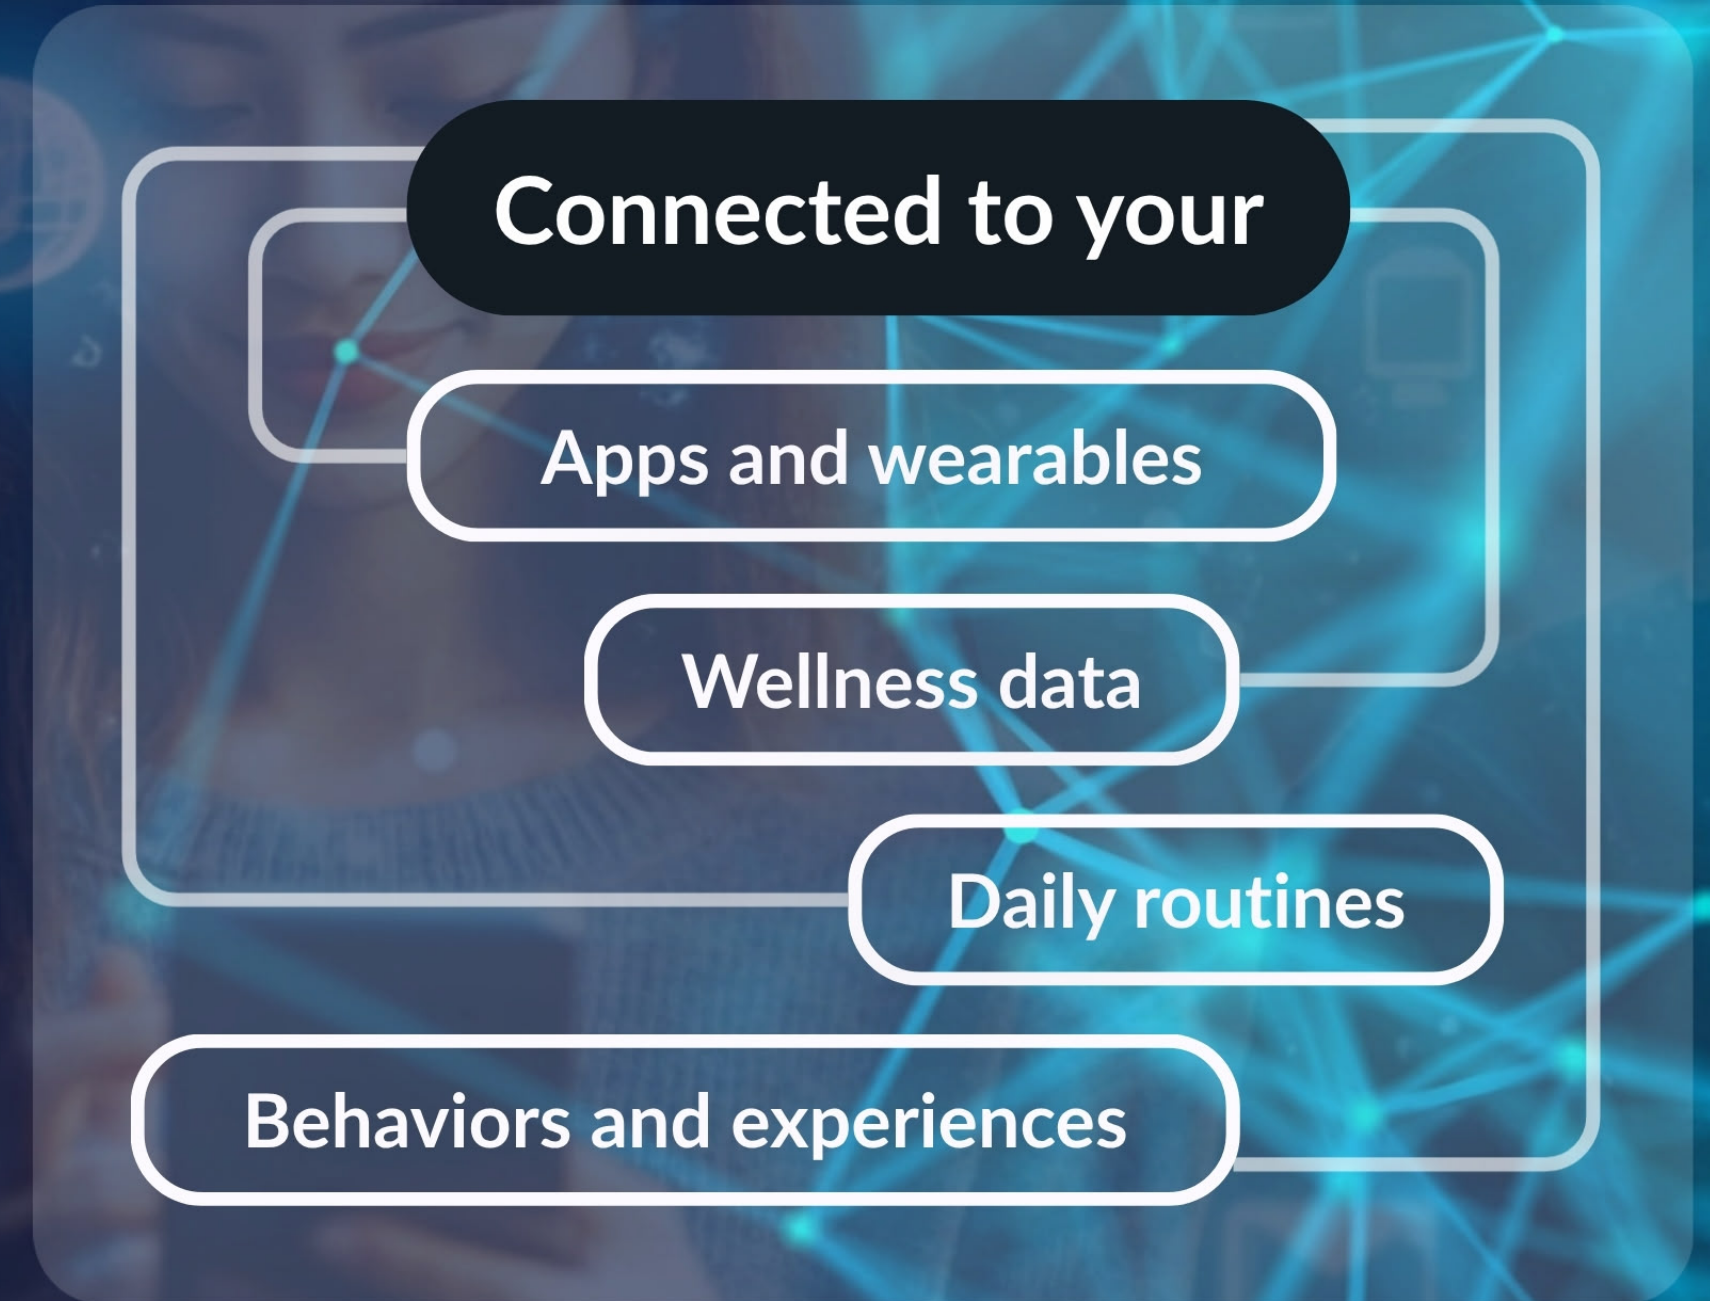

The thousands of small moments that make up a day

What if your AI could learn the same way?
That's the question **Vyvo Life CoPilot** was built to answer.

What Makes Vyvo Life CoPilot Different

Vyvo Life CoPilot goes beyond
the prompt – connecting AI
to your real life

Instead of only learning from prompts,
Vyvo Life CoPilot learns from life.

Over 1,000 Connections to Real Life

AI That Learns and Evolves With You

No **two users experience** the same **Vyvo Life CoPilot**

Becomes more personalized over time

Adapts in real time to your routines, behaviors, and environment

Recognizes patterns and shifts in your life as they happen

Delivers proactive insights that are grounded in your actual life

Most AI waits for your next command.

Vyvo Life CoPilot is designed to work quietly in the background —staying connected, adapting as your life changes, and getting smarter about you every single day.

Why This Matters

When **AI is connected** to your **real life**, everything it offers becomes more **relevant**.

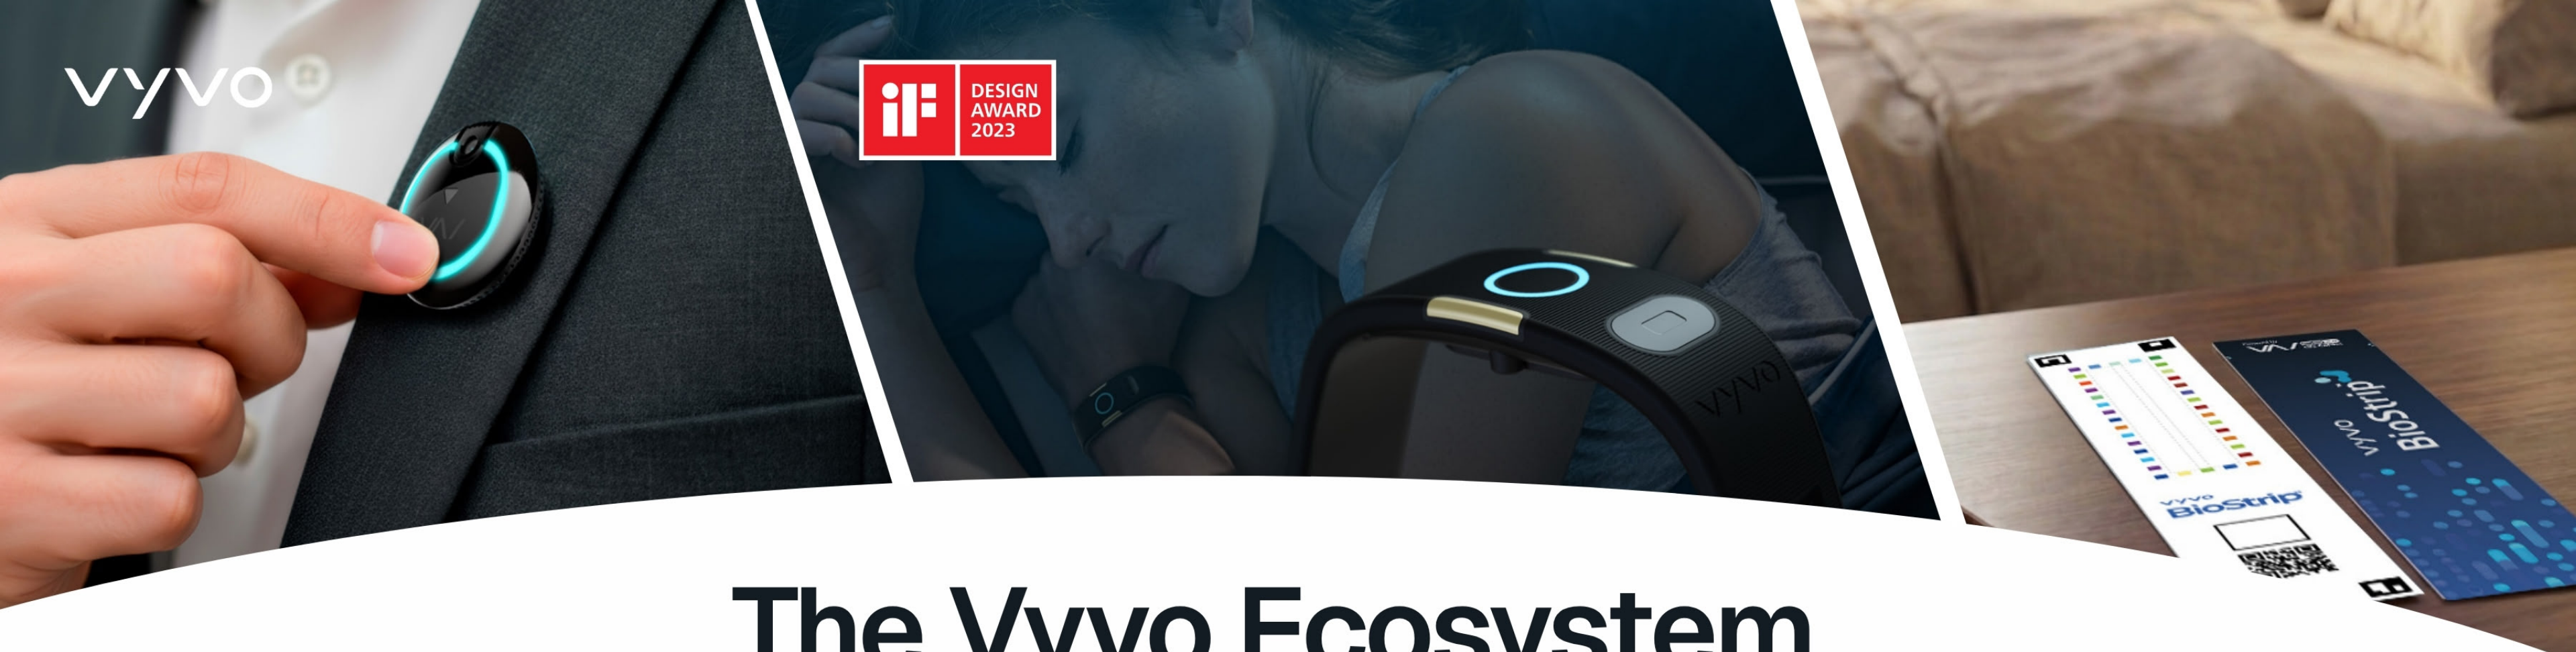

Vyvo Life CoPilot is designed to support

Better self-awareness
see how your body and habits affect your daily life

Smarter recommendations
guidance that fits your life because it comes from your life

Healthier routines
intelligent nudges grounded in real patterns

More connected living
seamless across health, home, schedule, and wellness

The Vyvo Ecosystem

Where **Technology** Meets **Real Life**

Vyvo LifeCopilot is powered by a collection of thoughtfully designed tools, each one built to connect **AI** to the world around you.

Orb | **BioSense Band** | **BioSense Watch** | **BioStrip**

Together, these tools provide Vyvo Life CoPilot with a continuous, multi-layered picture of your world. **Your environment, your body, and your biology all create an AI experience unlike anything a text-based AI experience alone could give you.**

BioStrip + Band

BioSense Band

*You're at a networking event and have a great conversation—but later, you can't remember the person's name or the details of what you discussed. **The Orb** captures everything around you in real time, so Vyvo Life CoPilot can recall that conversation and provide you with the details you need, making sure nothing slips through the cracks.*

*You wake up feeling off—tired, maybe a scratchy throat. Instead of guessing, Vyvo Life CoPilot already sees it coming. The information from your **Strips** detected subtle biological shifts, and your **Band** flagged disrupted sleep and elevated heart rate. **Together**, they tell you to hydrate, slow down, and get ahead of it before a minor dip turns into a sick day.*

*You want to get healthier, but every app gives you the same generic plan. **Vyvo Life CoPilot** uses your movement patterns, energy levels, and how your body actually responds to activity to build a fitness and nutrition routine that's uniquely yours—not a template, but a plan built from your real life.*

Launching at Miami
VYVO Partner Summit

VYVO | 2.0

A new Business Model

From community to entrepreneurship

We are evolving beyond the social and community model to give our business a new, more professional identity

become an Entrepreneur

This direction is the natural fit for the industry we operate in
— technology and artificial intelligence —
and positions every partner as a true business owner in the AI economy.

The affiliate model

A new structure built for the AI era

Affiliate ID

Each **affiliate** owns a unique **ID code** — their personal business identity in the **VYVO** ecosystem.

AI Marketplace

Every **affiliate** gets a dedicated **AI marketplace** to sell, share, and grow their business independently.

New reward system

A new rewards structure designed to overcome the historic limitations of the binary system.

Going live in August
